

Introducing Proof+Geist

FEBRUARY 2, 2021: The Proof Group and Geist Interactive, two longtime Claris partners, have joined forces to form Proof+Geist. Led by Ernest Koe (CEO), Todd Geist (CTO), and Steve Ritchie (CFO), Proof+Geist unlocks the full potential of the Claris Platform by providing an integrated suite of design and development services, hosting, tools, and products.

“We came together because both teams are fiercely committed to the idea that people come first, and that the right technology can augment and enhance the lives of humans. By joining forces, we will be able to do so much more — for the community, our clients, and our teams,” says CEO Ernest Koe. “We have a shared legacy of designing, building, and orchestrating systems for people who want to do great things. We’re expanding the range of our capabilities so that our customers can focus on their businesses knowing that their tools and systems are in good hands.”

“From the moment we started to talk about a potential partnership, it was clear that we could do something special,” says CTO Todd Geist. “Our customers were thriving, our teams fit together really well, and we had long shared a vision of empowering people through the use of technology. Together, as one team, we have the opportunity to do more for our customers, our community, and our teammates, and I couldn’t be more excited for what’s ahead.”

Proof+Geist offers a full array of technology products and services to guide clients through the process of building or improving their business systems, from concept to implementation. This includes product design, application development, systems integration, automation, infrastructure solutions, hosting, and support.

In addition to expanding its hosting offerings through Proof+Hosting, Proof+Geist will continue to invest in the core products of Proof, such as ProofEdu, as well as in the Geist Interactive FileMaker tools and add-ons that developers around the world depend on, such as the FMPerception Suite and Otto.

Proof+Geist also remains committed to the tradition of supporting the Claris FileMaker developer community by providing relevant, meaningful, and engaging free resources such as blog posts, demo files, conference/user group presentations, and answers to questions in the many online communities.
